RECOMMENDATION (Mark one box at right with "X")	PRIORITY	
	High	Low
Conduct an ESI		X
Prepare an HRS Package (No ESI Needed)		
Defer to Other Authority (e.g. RCRA, NRC)		
No Further Action Needed		
No Further Action Needed; Refer to State		

BASIS FOR RECOMMENDATION (Enter up to 20 lines of text)
Unless current information is sufficient for performing HRS, ESI is recommended. Data gaps include groundwater. Additional evaluation of surface water/sediment for human and eco. receptors is recommended in the future. Low priority is chosen because cancer risks > 1E-4 and noncancer risks > 1 appear, at this point, only for hypothetical future receptors.
